

SWISS EPHEMERIS for the year 1969

AUGUST 1969

00:00 UT

Table with 16 columns representing astronomical data and 31 rows representing days of the month.

Table with 17 columns representing astronomical data and 31 rows representing days of the month.

Julian Day Number = 2440434.5, Delta T = 39.76 sec
Ecliptic obliquity = 23°26'45", Nutation = 0°00'03"
Ayanamsha: Fagan/Bradley = 24°18'56", Lahiri = 23°25'56"

SWISS EPHEMERIS for the year 1969

DECEMBER 1969

00:00 UT

Main ephemeris table with columns: Day, Sid.t, ☉, ☽, ♀, ♀, ♂, ♃, ♅, ♁, ♁, ♃, ♄, ♆, ♇, ♈. Rows include days from M 1 to W 31 with corresponding astronomical data.

Detailed ephemeris table with columns: Day, ☉, ☽, ♀, ♀, ♂, ♃, ♅, ♁, ♁, ♃, ♄, ♆, ♇, ♈. Rows include days from M 1 to W 31 with declination and latitude data for various celestial bodies.

Julian Day Number = 2440556.5, Delta T = 40.10 sec
Ecliptic obliquity = 23°26'44", Nutation = 0°00'03"
Ayanamsha: Fagan/Bradley = 24°19'13", Lahiri = 23°26'13"
