---

**Note:**

- The table above contains the Ephemeris data for the years 1882. Each row represents a specific day of the month, showing the Sidereal Time (Sid.t), terrestrial time, and other celestial coordinates.

- The columns are labeled as follows: Day, Sid.t, Terra, etc., indicating different celestial positions and movements.

- The data is formatted in a tabular manner, with columns for different celestial objects and events.

- The longitude and latitude values are given in degrees, minutes, and seconds.

- The table is used for astronomical calculations and predictions for the year 1882.
